

ABISHEAK S

SENIOR SOFTWARE ENGINEER | Java | Spring Boot | Microservices | Kafka | Angular

+91-9080474311 | abisheekarun11@gmail.com | linkedin.com/in/abishek26s | leetcode/abisheak11s

SUMMARY

Full Stack Engineer **with 5+ years of experience** building enterprise applications using **Java, Spring Boot, Microservices, and Angular**. Experienced in backend development, distributed systems, frontend modernization, accessibility, AI-assisted engineering workflows, and test automation.

EXPERIENCE

Software Engineer II

Jan 2024 – Present

Rocket Software | Enterprise Content Management

Chennai

- Designed and implemented an **AI-assisted developer workflow** using GitHub Copilot to automate Jira ticket analysis, code generation, testing, documentation, and PR creation, improving developer **productivity by 50%**.
- Implemented **server-side JWT invalidation** using **Hazelcast**, reducing the post-logout token exposure window from up to **5 hours to near zero** across clustered application nodes
- Re-engineered **PDF document rendering and content-selection functionality** following a **security-driven PDF.js upgrade**, restoring key enterprise capabilities for a strategic customer engagement contributing to a **\$10M contract**.
- Modernized the enterprise application by **upgrading Angular from version 13 to 21**, migrating legacy modules to Angular 21 and PrimeNG while improving application maintainability and long-term support.
- Implemented WCAG-compliant accessibility standards and built reusable UI components (tables, trees, dropdowns, typeaheads, and modals), **improving accessibility scores by 90%** and accelerating feature development.
- Developed Playwright regression automation**, reducing manual regression testing effort by **95%** while resolving critical production issues through rapid root cause analysis.

Software Engineer

Sep 2021 – Jan 2024

Mphasis | FedEx Logistics Platform

Chennai

- Developed and enhanced backend microservices** for FedEx's enterprise logistics and warehouse management platform using Java, Spring Boot, REST APIs, ActiveMQ, and Cassandra, supporting warehouse, facility, and operational workflows across a distributed logistics system.
- Engineered asynchronous event-driven processing** using ActiveMQ by publishing business events from microservices and building batch-processing workflows for scheduled and on-demand message delivery, improving processing reliability and operational efficiency.
- Optimized REST APIs across Java Spring Boot microservices by improving backend processing and performance for logistics workflows.
- Developed automated backend **regression test suites using TestNG**, improving release confidence while mentoring 4 junior engineers through code reviews and technical guidance.

PROJECTS

InvoiceR — Multi-Tenant Billing, HR & Payroll | Java, Spring Boot, Angular, PostgreSQL, JWT, RBAC

- Built a multi-tenant SaaS application with tenant-isolated data, JWT authentication, refresh tokens, and role-based access control.
- Implemented billing, HR, payroll, tax configuration, PDF generation, and self-service workflows with Dockerized deployment.

ACHIEVEMENTS

Won Rocket Software's Build25 Hackathon for developing **Rocket Support Explorer**, an AI-powered support engineering solution that centralized issue analysis and automated troubleshooting.

EDUCATION

Vel Tech High Tech Engineering College – Bachelor of Engineering

Aug. 2017 - Apr 2021 | Chennai

TECHNICAL SKILLS

Languages: Java, TypeScript, SQL, Python

Backend: Spring Boot, Kafka, Hibernate, REST APIs, Microservices, ActiveMQ, Multithreading

Frontend: Angular, TypeScript, HTML5, CSS3, PrimeNG, PDF.js

Databases: PostgreSQL, Oracle, Cassandra

Architecture & Concepts: Distributed Systems, Event-Driven Architecture, System Design, Accessibility (WCAG), GitHub Copilot

Build & DevOps: Maven, Gradle, Jenkins, CI/CD, Git, Kubernetes

Testing & Automation: JUnit, Mockito, TestNG, Playwright
